

These supplemental instructions apply to 2018+ Jeep JL Wranglers and JT Gladiators **with manual transmissions** equipped with:

M6 Relearn Supplement

This “top gear” relearn procedure is **required** after changing the tire size setting on a **manual transmission** Wrangler JL or Gladiator JT **above 33 inches**.

Failure to follow these steps will result in an **Electronic Stop-Start (ESS) error**.

The procedure:

1. Set your tire size through the engine-off Vehicle Settings menu according to the manual for your Tazer. Find the manual for your device here: <https://www.zautomotive.com/instructions/>
2. Perform a “Full Reboot” using the menu option in the engine-off Vehicle Settings menu.
3. Disconnect the negative terminal **on both your primary and AUX batteries** for one minute.
4. Connect your batteries, **set the ignition to RUN with the engine off** and perform **TWO SLEEP CYCLES** as described on the “Critical Information” page of the manual for your Tazer.
5. **For the relearn to take, you must accelerate to highway speed (40-80 MPH) and enter sixth gear while maintaining some accelerator pedal pressure (without decelerating) for about 30 seconds.**
6. Once finished with the drive, **set the ignition to RUN with the engine off** and **TWO MORE SLEEP CYCLES** as described on the Critical Information page of the manual.
